FORT A.P. Hill DEER HARVEST REPORT 2025 - 2026

Fort A.P. Hill 2025-2026 Deer Harvest Report

The 2025-2026 total deer harvest for Fort A.P. Hill (FAPH) was 401, which is down from the 2025-2026 season harvest of 504 (-20%). There were 224 (56%) bucks and 177 (44%) does harvested. The number of hunting trips decreased from 8,951 (2024) to 7,403 (2025). The number of hours to harvest a deer remained similar at 107.8 hours compared to 108.5 hours in 2024. A more in-depth review of the harvest data can be found in the data section of this report.

2025-2026 Hunting Season Review

The 2025-2026 season was impacted in multiple ways due to the government shutdown. The halt on permit sales and background checks reduced hunter participation and the volume of hunting trips. Fortunately, we were able to keep hunting open, but restrictions such as no muzzleloaders and CA area closure impacted the overall harvest. We encourage you to process your background check before October 1st as this date marks the start of the fiscal year. This may help avoid potential delays in processing your paperwork in the event of a government shutdown in the future.

Going into the season, the expectation was to harvest more does due to increased either-sex days and antlerless tags available. We added an additional 21 either-sex days during general firearms season to promote doe harvest, especially in the CAs. We harvested 177 does, which is a 10% decrease from last year, but the third highest doe harvest in the last 12 years. Typically, the two weeks of muzzleloader make up 30% or more of our total deer harvest and the majority of our mature bucks. This year it contributed to only 12% of our total deer harvest resulting in our lowest annual buck harvest since 1985. Due to the CA's being closed for half the season, there was a 40% drop in harvest in the CA's year over year. Despite the decrease in harvest, we feel the deer herd is in great health and believe the low deer harvest is due to the variables surrounding the government shutdown (fewer check-ins, permit sales, CA closures, muzzleloader restrictions etc).

We continue to place an emphasis on failed check-outs. Please continue to be diligent in your communication with us, and one another to avoid failed checkouts. Another violation that occurred several times this past season was the dumping of deer carcasses. Reminder, besides field dressing, the carcass MUST leave with you.

Approximately 1% of the deer harvested showed signs of having survived Epizootic Hemorrhagic Disease (EHD). We had very few reports of dead deer along bodies of water this summer/fall. With the combination of multiple minor outbreaks in the last few years and lack of dead deer sightings, the assumption would be that immunity is strong in the deer herd. Please report all dead deer sightings, especially in the September scouting season.

Continue to monitor iSportsman throughout the year as this is our best way to communicate changes to regulations, gate closures, additional either-sex days, etc. This includes reading ALL acknowledgements before accepting them.

Bears and Feral Hogs

No bears were harvested on FAPH again this season. Bear sightings have remained consistent at several per year. Bears were harvested for two consecutive seasons, one in 2012 and one in 2013. It is not believed there are resident bears calling FAPH their home currently.

No hog sightings have been reported in years. If a hunter does see a feral hog or feral hog sign, we ask that you report it immediately.

Expectations for Next Season

Next season's antler production and weights are expected to be up due to this fall's excellent acorn production. The deer herd is in good condition, and the expectation is an increase in harvest for next season.

We do not anticipate any major changes to next year's regulations or recreational map. Our objective is to increase doe harvest and will manage accordingly for the 2026-2027 season. These objectives are based on current deer herd conditions but could be adjusted as conditions change (ex. EHD outbreak). There will always be minor changes as we continue to improve the program, so please read the 2026-2027 regulations from front to back.

Please continue to report violations, sightings, or anything out of the ordinary, as you are part of making Fort A.P. Hill a great experience for everyone. Thank you for your support and assistance during this past season with managing the natural resources on FAPH. We look forward to seeing everyone during turkey season.
